What this pocket guide covers

Use the page you need at the moment. Menu names can vary by Raptor permissions or software updates.

- Select the correct campus
- Plan a drill
- Complete a drill
- Upload drill evidence
- Review a completed drill
- Document after-action findings
- Check drill compliance
- Access & functional needs
- Actual emergency vs. drill
- Monthly campus POC check
- Supervisor district-wide check
- Evidence retention quick list

Important: Raptor is a tracking and documentation tool. A Raptor entry by itself does not replace the underlying Texas requirement, district EOP procedure, staff training, accommodation, or corrective action.

1. SELECT THE CORRECT CAMPUS

Before entering or reviewing anything, confirm you are working in the correct Bishop CISD campus record.

HOW TO

1. Open **Raptor Emergency Management**.
2. Choose the applicable school/campus.
3. Open **Drill Manager**.
4. Confirm the campus name and drill requirement before entering dates or attaching evidence.

QUICK CHECK

Correct campus + correct drill requirement + correct school year.

COMPLIANCE NOTE

Avoid attaching one campus's evidence to another campus's drill record.

2. PLAN A DRILL

Use the Plan function when a required drill has not yet occurred.

HOW TO

1. Open **Drill Manager** and locate the required drill.
2. Open the drill requirement and select the planning option available to your role.
3. Enter the planned date and any required planning fields.
4. Save the planned drill and verify its status reflects the plan.
5. Use calendar/reminder features if helpful.

QUICK CHECK

Planned date is within the district's required window.

COMPLIANCE NOTE

Texas requires specified emergency drills; district schedules should also follow the EOP and local fire authority requirements.

3. COMPLETE A DRILL

After the drill occurs, update the record so Raptor reflects what actually happened.

HOW TO

1. Locate the planned/required drill in **Drill Manager**.
2. Enter the actual start and end information requested by Raptor.
3. Complete required fields such as who initiated/ended the drill, when shown.
4. Enter required notes or drill-specific questions.
5. Mark/submit the drill as complete, then verify the status shows **Complete**.

QUICK CHECK

Actual date/time entered + required fields answered + status = Complete.

COMPLIANCE NOTE

Raptor's published Drill Manager guidance supports recording actual start/end information, personnel, notes, and documentation.

4. UPLOAD DRILL EVIDENCE

Attach supporting documentation to the completed drill record.

HOW TO

1. Go to **Emergency Management** → **correct campus** → **Drill Manager**.
2. Find the drill showing **Complete**.
3. Select **Review** for that drill.
4. Scroll to the file area and choose **Select File**.
5. Choose the supporting file from the device.
6. Upload/save if prompted.
7. Reopen/review the record and confirm the attachment is present.

QUICK CHECK

Never assume the upload worked—verify the file appears on the completed drill record.

COMPLIANCE NOTE

The Raptor Drill Manager documentation states that building administrators can upload a PDF document and capture drill notes.

5. WHAT TO ATTACH

Preserve enough evidence to show the drill occurred and that issues were addressed.

HOW TO

1. Attach the district drill record/form when used.
2. Attach an After-Action Report (AAR) when applicable.
3. Preserve accountability documentation when applicable and appropriate.
4. Document identified problems and corrective actions.
5. Add follow-up evidence when a deficiency was corrected.

QUICK CHECK

Record → findings → corrective action → follow-up.

COMPLIANCE NOTE

Do not upload unnecessary student-sensitive information. Follow district record-handling and privacy practices.

6. AFTER-ACTION REVIEW

Use every drill to identify what worked and what needs correction.

HOW TO

1. Record significant observations immediately after the drill.
2. Identify communication, accountability, access, door, movement, or procedure problems.
3. Assign corrective action to the appropriate district/campus process.
4. Retain the AAR or notes with the drill evidence when appropriate.
5. Verify follow-up rather than simply closing the issue.

QUICK CHECK

What happened? What failed? Who owns the fix? Was the fix verified?

COMPLIANCE NOTE

Current Texas drill guidance recommends planning for post-drill or after-action reviews.

7. CHECK DRILL COMPLIANCE

Use Raptor's drill status and reporting functions to identify missing, planned, or completed requirements.

HOW TO

1. Open Drill Manager for the campus.
2. Review each requirement's status.
3. Look for **Not Planned**, overdue, incomplete, or missing-documentation items.
4. Correct record errors or notify the responsible campus POC.
5. Use district/school reports when available to confirm the overall picture.

QUICK CHECK

No required drill should disappear into a calendar—verify completion in the system.

COMPLIANCE NOTE

Raptor states Drill Manager provides school- and district-level reporting and compliance tracking.

8. ACCESS & FUNCTIONAL NEEDS

Emergency drills must account for students and personnel who need accommodations or assistance.

HOW TO

1. Before the drill, follow district procedures for known access and functional needs.
2. Ensure required IEP/504 drill accommodations are incorporated.
3. Brief appropriate personnel who have close and continuous contact with affected students, as required by district procedure.
4. During the drill, provide equal access to safety.
5. Document issues and needed corrections without placing confidential details in inappropriate records.

QUICK CHECK

Participation + appropriate accommodation + safe accountability.

COMPLIANCE NOTE

Effective July 26, 2026, 19 TAC §103.1209 includes requirements implementing equal access to safety during mandatory drills for students with access and functional needs.

9. DRILL VS. ACTUAL EMERGENCY

Keep training records and real-event documentation clearly distinguished.

HOW TO

1. Use Drill Manager for scheduled/required drill activity.
2. For a real incident, follow the Bishop Cisd EOP and Raptor emergency workflow applicable to the event.
3. Do not create a false drill record to substitute for an actual-event record.
4. Preserve incident documentation and any subsequent AAR/corrective action through the proper district process.

QUICK CHECK

Drill = practice of a specific function. Actual event = real emergency response.

COMPLIANCE NOTE

Texas defines a drill as testing a single specific operation/function and prohibits role-playing active aggressors or simulated threats as part of a drill.

10. MONTHLY CAMPUS POC CHECK

A short recurring review helps prevent missing documentation before an audit or DVA review.

HOW TO

1. Review current drill schedule and upcoming due dates.
2. Confirm completed drills show Complete.
3. Confirm supporting files are attached where required.
4. Review open AAR/corrective-action items.
5. Check that accommodations and communication procedures remain current.
6. Report missing records or unresolved issues to the appropriate administrator/safety contact.

QUICK CHECK

Schedule → completion → evidence → corrective action.

COMPLIANCE NOTE

Use this as an internal quality-control practice; it does not replace district policy or statutory requirements.

11. SCHOOL MARSHAL / SUPERVISOR CHECK

Use a district-wide view to verify consistency across campuses.

HOW TO

1. Review each campus's drill status.
2. Spot-check completed drill evidence.
3. Identify overdue or incomplete requirements.
4. Compare drill records against EOP/DVA evidence needs.
5. Track recurring findings that may require district-level corrective action.
6. Preserve verification notes for the district safety/compliance record.

QUICK CHECK

All campuses reviewed + exceptions documented + follow-up assigned.

COMPLIANCE NOTE

Raptor supports district-level drill compliance visibility; the district should still validate the underlying evidence.

12. TEXAS DRILL QUICK REFERENCE

Current 19 TAC §103.1209 establishes the statewide minimum drill framework.

HOW TO

1. Secure: **1 per school year.**
2. Lockdown: **2 per school year - once per semester.**
3. Evacuation: **1 per school year.**
4. Shelter (severe weather or hazmat): **1 per school year.**
5. Fire drills: follow the requirements/recommendations of the local authority having jurisdiction, such as the fire marshal.
6. Districts may conduct additional drills when appropriate.

QUICK CHECK

Always compare the state minimum with Bishop CISD's adopted EOP/drill schedule.

COMPLIANCE NOTE

Based on the 2026 amendment to 19 TAC §103.1209. Verify future rule changes before reusing this page in later school years.

ONE-MINUTE CHECK

Before you close Raptor

- Correct campus selected
- Correct drill selected
- Actual date/time entered
- Required questions/notes completed
- Status shows Complete
- Evidence uploaded
- Attachment verified
- AAR/corrective action documented if needed
- Access/functional-needs issues addressed
- Any unresolved issue routed for follow-up
